SUMMARY

Enthusiastic Computer Science Engineering student with strong skills in C, C++, Python, web development, and database management. Experienced in developing user-centric web applications and IoT-based solutions through academic and personal projects. Passionate about problem-solving, software development, and integrating hardware with software to create innovative and practical solutions. Eager to contribute technical expertise and continuously learn emerging technologies in a professional environment.

EDUCATION AND TRAINING

Bachelor Of Engineering, Computer Science And Engineering

BMS Institute Of Technology And Management, Bengaluru
8.87 CGPA

2028
Bengaluru

Class 12, Computer Science

Kendriya Vidyalaya Keltron Nagar, Kannur
86.2% in AISSCE

05/2024
Kannur

SKILLS

- Software development
- C++ programming
- Database management
- Problem solving
- Team collaboration
- Multitasking
- Friendly, positive attitude
- Problem-solving
- Web development
- Python programming
- Java debugging techniques
- Project management
- Leadership
- Verbal communication
- Fluent English
- Prompt Engineering

PROJECT

Thayappura Hotel Booking 🔗

- Developed a full-stack resort booking platform using Antigravity, Firebase Authentication, and Firestore, featuring real-time booking management, an admin dashboard, and PWA support for efficient customer reservation and property management.

Anti-Sleep Alarm System

- Built an Arduino-based driver safety system using eye-blink detection sensors and C++, enabling real-time drowsiness detection and alert generation to help prevent road accidents.

F1 Watch Party Website 🔗

- Built a Formula 1 community website with Firebase integration, featuring race updates and fan engagement tools.

Sugu Discord Chat Bot

- Developed and deployed a Discord community management bot using Node.js and discord.js, integrating the Groq API (Llama 3.3) to provide AI-powered conversations, moderation, and server automation features.
